After you download the MDC data from the book website (see the link on the class webpage) Extract Chapter_2_MDC file. The following steps will get the data into your SQL Server instance.

- 1. open the access database and then save it in 2007 format.
- 2. Click on Database tools tab
- 3. Select SQL Server
- 4. Select Create a new database and select next.

Upsizing Wizard	And Andrew Andrew Andrew	
	The Upsizing Wizard allows you to easily upsize your Microsoft Access database to a Microsoft SQL Server database. You can create a new SQL Server database or upsize to an existing SQL Server database. Which do you want to do?	
	 Use existing database Create new database After you click the Next button, you'll supply information for the new database. 	
Help	Cancel < Back Next > Einish	

5. My computer's name is DOT. The default instance of a sql server for express is [computername]\SQLExpress. Fill in the SQL Server and select Trusted Connection and click

next.

Upsizing Wizard	the second design of the secon	
	What <u>SQL</u> Server would you like to use for this database?	
	DOT\SQLExpress	
	Please specify the login ID and password of an account with CREATE DATABASE privileges on this server.	
	☑ <u>U</u> se Trusted Connection	
	Login ID; scot	
	Password:	
	What do you want to name your new SQL Server <u>d</u> atabase?
