CPTR 319 2009Review 13 & ADO.NET (Final Exam)

ODBC, OLE DB, XML, ADO.NET

General Information

Time: April 29, 10:00 AM
Place: HSC 107/116

Nature: comprehensive

The final exam is comprehensive, so make sure that you review the following in addition to this document.

- http://www.cs.southern.edu/scot/CPTR319/CPTR%20319%20Exam%201%20Review%20-%20Answers.pdf
- http://www.cs.southern.edu/scot/CPTR319/CPTR%20319%20Exam%202%20Review%20Answers.pdf

Extra Credit

Bring a paragraph response to your reading that you have done this semester to the final. It can be anything you would like to say. This is just a response to the reading. No matter what you say, you will get the extra credit. Just please give me honest feedback.

There will be a question on the final (just a check box) asking if you got your 7 hours of sleep per school night and ate breakfast each morning. This is for the other part of your extra credit.

Chapter 13 & ADO.NET Content

Review the T/F and multiple choice question from the homework. A selection of these (in a different form) will be on the exam. NO PROGRAMMING will be on the exam, your projects cover that.

I introduced several specific elements of ADO.NET. DataSet, DataAdaptor, BindingSource, BindingNavigator, and GUI elements such as the GridView and TextBoxs. You should know how to use these objects with a database. Of course the questions will be purely theoretical – no code.

Test Format

The written portion of this exam will be some of: short answer, T/F, and matching. The computer portion will use SQL server and Visio in HSC 116.
